SUMMARY

A self-motivated Software Engineer with 4+ years of industry experience in building, optimizing, and scaling backend systems. Specialized in building secure REST APIs and microservices using Python (FastAPI, Django) and Java (Spring Boot). Skilled in SQL optimization, high-volume data processing, and cross-team collaboration.

SKILLS

- Languages:** Python, Java
- Databases:** PostgreSQL, MySQL, Oracle SQL, MongoDB, Firebase
- Frameworks:** Django, FastAPI, Spring Boot
- Tools:** Git, Jira, Claude

SOFT SKILLS

- Adaptability & attention to detail
- Cross country collaboration
- Leadership in small teams

WORK EXPERIENCE

Penta Global Limited

Software Engineer • 2024 - Present

Delivering high-quality backend solutions for large-scale products and internal business applications

- Backend development on multiple projects using frameworks like Java Spring Boot, FastAPI, Django
- Working with large volumes of highly sensitive data
- Working on fast paced projects
- Built and maintained secure REST APIs using Java Spring Boot, FastAPI, and Django
- Designed microservice architectures that allowed systems to scale efficiently without downtime
- Optimized databases (PostgreSQL, MySQL) to handle high-volume transactions and large datasets
- Reduced system bottlenecks and improved response times through code and query optimization
- Collaborated with product managers and front-end teams to deliver features on time and within scope

UTime, USA (Remote)

Lead Software Developer • 2022 - 2023

Design, planning and development of an IOS application along with automation with the help of AI tools and APIs

- Worked on an Education Technology based product
- Worked directly with the Founders on planning roadmaps
- Designed backend APIs and integrated AI tools (Microsoft AI Builder) into workflows.
- Integrating APIs into IOS application using Swift
- Assisting planning and design using Figma
- Leadership and collaboration in a small team
- Planning the production, assigning tasks to peers, managing product development in a given timeframe

ICT Center, Ahsanullah University of Science and Technology

Software Engineer • 2022 - 2022

Development, Planning and user support of an In-house University Management System

- Full stack web development using Java, Spring, HTML, CSS, AngularJs, Typescript
- Using Oracle SQL for development and for providing data reports
- Conducting meeting with the authority, retrieving requirements and presenting new features

EDUCATION

Bachelor of Science • 2017 - 2021

Department of Computer Science and Engineering (CGPA: 3.57/4.00)

University of Dhaka
